Trademark Classification Numbers

Question 5 on the trademark registration and renewal forms ask you to provide three samples of the mark and “classification number(s).” A classification number is a code you choose that describes what kind of product/material your mark will be used on. It doesn’t describe how the mark is used. With that in mind, per Arizona Revised Statutes (A.R.S.) § 44-1449, refer to the list below for those codes. Please only supply the number at the start of each description, not the entire text following the number. You can select as many classification numbers as you see fit.

A.R.S. § 44-1449. Classification of goods or services

A single application for registration of a mark may include all goods and services on which the mark is actually being used in one or multiple classes.
