

**MARICOPA COUNTY, ARIZONA**  
**CD8 SPECIAL PRIMARY ELECTION – FEBRUARY 27, 2018**  
**HAND COUNT/AUDIT REPORT**

**Synopsis:**

Pursuant to A.R.S. §16-602(B), Maricopa County conducted the hand count/early ballot audit for the **February 27, 2018 CD8 Special Election**. 2% of the polling sites were counted as required by statute, which amounted to 2 polling sites out of 55 total polling sites used for this election.

The hand count began on **Wednesday, February 28, 2018** at **6:00pm** when the Maricopa County Chairs of the Republican and Democratic Party met to select the polling sites, early ballot audit batches, and early voting site touch screen (DRE) machine to be audited. The Libertarian & Green Party Chairs were not present for this draw. All ballots were accounted for in the central counting location before the selection process started. The selection order was chosen by lot, and the **Republican** Party was chosen to go first followed by the **Democratic** Party.

With the order established, the specific polling sites and early voting batches to be counted were selected with the participating County Party Chair's alternating the selection.

**Two** contested races were chosen by default being that the Congressional District 8 office was the only race on this Special Election ballot. Specifically, the following are the contested races that were audited:

- Federal Candidates – **U.S. Representative CD8 - REP** (55 polling sites)
- Federal Candidates – **U.S. Representative CD8 - DEM** (55 polling sites)

The physical hand count started at **9:00am** on **Thursday, March 1, 2018** and was concluded at **3:45pm** on **Thursday, March 1, 2018**. The tabulation method used was the stacking method for the optical scan ballots and the tally method for the touch screen accessible voting devices (DRE). The audit was conducted by 10 boards made up of 3 members, of which not more than 2 members were from the same political party. This hand count included votes cast on both the optical scan and touch screen devices from the selected polling sites.

**Early Ballot Audit:**

1% of early ballots were audited as per Arizona State Law. The early ballot audit consisted of 10 batches with at least 1 batch from every machine used for tabulation. Each batch contained approximately 200 early ballots. There were over 100,000 early ballots cast in Maricopa County for this **CD8 Special Primary Election** (*1% of the total early ballots cast or 5,000, whichever is less*). Only 5 batches of 200 were required to be audited based on the 1% requirement. However, this office opted to increase that to the 10 total batches that were ultimately reviewed.

**Comments:**

If a discrepancy occurred, the reason for the discrepancy is notated and described in each report. Please find the following precinct and early ballot reports for your review. When a comment is noted indicating "*Intent vote(s)*", this term describes votes that were unreadable by the machine but were determined by the boards to be votes for a given candidate or issue. As an example, ballots where the voter circled the candidate's name instead of connecting the arrow pointing to the candidate's name, as instructed. These "*Intent vote(s)*", although not a machine error, are still being included as part of the designated margin calculations. For any marks indicated by the boards as missed by the machine (*too light, red pen, etc.*), those totals are being noted as "*Machine Errors*" in the following reports and are also part of the designated margin calculations.

A handwritten signature in black ink, appearing to read "Adrian Fontes".

**Adrian Fontes**

# "POLLING SITE SPECIFIC" HAND COUNT REPORTS AND "EARLY BALLOT BATCH SPECIFIC" HAND COUNT REPORTS FOLLOW THIS SUMMARY

---

---

THE FOLLOWING WORKSHEETS ARE THE SUPPORTING AND DETAILED COUNTS THAT WERE USED TO DERIVE THE ABOVE

---

If any variances occurred, the specific Polling Site or Early Ballot Hand Count Reports that follow would indicate the reasons for these variances in the "Comments" section for the affected "Race Category". Those variances are noted as part of the designated margin calculation when "**Intent vote(s)**" or "**Machine Error**" is deemed to have occurred based on the Board's audit. For those variances noted as "*Intent vote(s)*" errors, this reflects votes that were unreadable by the machine but were determined by the boards to be votes for a given candidate or issue. As an example, ballots where the voter circled the candidate's name instead of connecting the arrow pointing to the candidate's name (*as instructed*) OR where there were very visible and profound bleed-through marks from the back of the ballot where the machine saw this as an actual readable mark on the front of the ballot, and so on. The machine is faulted for this despite it not actually being a machine read error and this occurrence is included as a machine error variance and is part of the designated margin calculation.

For any marks not read by the machine because they were too light or marginal marks for the machine to accurately read them or the board, upon their verified count, deemed the machine count to be in error, those would be listed as "*Machine Errors*" and as such those totals would also be part of the designated margin calculations, if existing. All variances, if any, are noted in the final result reports that follow.
